Ms. Monica Khurana (School Principal)

principal@themillenniumschoolorg

About the School:

India is at the forefront of the global revolution. Committed to this purpose, is The Millennium School (TMS). It understands the unique learning potential of every child and has geared its Millennium Learning System to provide students with a better understanding of life and its subjects, so that they prepare for today, for their greater role tomorrow in shaping the Indian Millennium. TMS-Surat, is an English-medium, co-education, day-boarding school, which was founded in 2013. TMS-Surat is a K-12 School affiliated to the Central Board of Secondary Education (CBSE), New Delhi.

Our Vision:

The Millennium School is committed to nurture the inherent potential and talent of each child, to create lifelong learners who will be the leaders of tomorrow. With Parents as our partners, we aspire to create global citizens who are innovative and have a strong sense of values.

Our Mission:

To inspire evolvement of children into self-reliant, value oriented individuals, to foster spiritual upliftment and infuse a spirit of responsibility for the emergence of a global society.

Our Values

- Building Leadership
- Education is Innovation
- Lifelong Learning
- Every Stakeholder Counts
- One with Nature

Our Curriculum

For Kindergarten, we follow the Seven Petal Approach to learning where every day is a joyful experience and results in holistic development of every child. The Seven Petal Approach ensures holistic development of every child based on Sequential Learning and Developmental Milestones and makes the use of the Eclectic Approach model, to subsequently improve learning effectiveness.

For Class I to XII, we follow the curriculum prescribed by the Central Board of Secondary Education (CBSE), with the support of the Millennium Learning System™ (MLS). MLS is a unique learning system that is scientifically developed and is based on the best teaching systems in the world. The MLS is inspired from ancient Indian philosophy of learning and matches all the best international practices in education. For our students, learning becomes a fun and exciting experience. MLS takes learning beyond books and classrooms and prepares the students for the universe and not just the university.

Classes	Teaching-Learning Methodology	Implementation
Kindergarten (TMS Junior Wing / Little Millennium)	Play-based	Theme based with more than 3000 activities
Class I to V (MLS I)	Project-based	Participation in more than 800 projects through the year
Classes VI to VII (MLS II)	Apprentice-based	Introduction to over 750 vocations and fields
Class VIII (MLS III)	Mind Mapping	Learning with graphic organisers to develop skills
Classes IX to XII (MLS IV)	Brain-based	Real applications of concepts using strategies

How is MLS implemented?

Every standpoint for MLS has been developed at the Research and Development Division of Education Quality Foundation of India (EQFI), with a focused outcome in mind. This outcome is clearly understood through our vision for every child who enters the system. Age-appropriate, psychologically-mapped and pedagogically-apt tangibles are used at every level of the Millennium Learning System. Some of these are the books, the assessment system and the lesson plans.

Books

The personalized dictionary, concept books, project books, follow-up journals, apprentice manuals, explorer's quest and portfolios are all designed to help in the process of building relevant skills. Learners' creativity, data handling skills and presentation skills are automatically built along with social and emotional skills as they learn through collaboration and peer interaction.

Classrooms that resound with the joy of learning

Suitable support and training ensures that the facilitators are empowered to create a motivating atmosphere. The classrooms become vibrant with the process of teaching-learning. The overall effect is not just a passive transfer of information, but lively, interactive and enjoyable sessions where the learners develop confidence and build skills as they understand and apply the knowledge by connecting it to their daily life.

Assessments

Assessments are a very important part of the curriculum of the Millennium Learning System. It aids to bring up the skill levels of each learner. A system of regular Formative Assessments and Summative Assessments help achieve this.

Grading System								
GRADE	A1	A2	B1	B2	C1	C2	D	E
%	100-91	90-81	80-71	70-61	60-51	50-41	40-33	32-0
